

# TravelBrew

📅 20 Nov 2023

## What is TravelBrew

TravelBrew is a mobile application designed to assist travelers in discovering the nearby cafes, gas stations, and restaurants in the places they visit.

The app empowers users to explore top-notch venues that cater to their essential needs, such as coffee, sandwiches, seating areas, restaurants, gas stations and restrooms, while they travel through different cities.

## Purpose

We designed 'TravelBrew,' an useful React Native app that shows nearby gas stations, cafés, and restaurants for the WWCode App Deploy Hackathon.

## Scope

---

Our app stands out from other maps by offering a uniquely user-friendly interface and seamless navigation experience, ensuring efficient discovery of nearby cafes, gas stations, and restaurants. With a focus on intuitive design and real-time updates, it provides a distinct and enhanced exploration of your surroundings compared to other mapping applications.
